# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

Temperatures will trend closer to seasonal by this weekend as the ridge shifts eastward and an upper low approaches from the southwest. There will be a risk of afternoon and evening thunderstorms across portions of the interior through Monday.

#### **Medford Weather:**

Temperatures for this heat wave will peak today and it will likely be the hottest temperature observed for many sites this year. Isolated to scattered dry thunderstorm activity in the Oregon Cascades and Siskiyou and isolated mostly dry storms across Siskiyou County this afternoon and evening. Saturday will bring the greatest threat of thunderstorms for areas west of the Cascades. Sunday through Wednesday there still remains a threat of showers and thunderstorms over the area.

#### **Reno Weather:**

Moisture will spread north across the region today and bring a chance for showers and thunderstorms mainly near the Sierra and in western Nevada south of Highway 50, with gusty outflow winds and lightning induced fire starts possible. The best overall shower and thunderstorm potential is expected for this weekend, with locally heavy rainfall and flooding becoming the main threats.

#### **San Francisco Weather:**

A cooling trend can be expected today and through the weekend. Subtropical moisture streaming into the forecast area may produce a few isolated showers and thunderstorms today and tonight.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

#### **Sacramento Weather:**

A slow cooling trend is forecast into next week. Daytime highs will be near normal by Sunday and at or below normal much of next week. Scattered mountain thunderstorms through Monday as monsoon moisture is pulled northward, elsewhere, dry conditions will continue.

#### **Hanford Weather:**

An increase in moisture over the forecast area will bring a chance of showers and thunderstorms through Saturday, especially over the mountains and desert. A drying trend is expected by Sunday as upper level winds become more southwesterly.

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

There will be a slight chance of thunderstorms across the mountains, the Antelope Valley, and interior sections of San Luis Obispo and Santa Barbara Counties today. For this weekend, any thunderstorms should be confined to the mountains of Los Angeles and Ventura Counties and the Antelope Valley. More stable southwesterly flow aloft will set up Monday through Thursday with dry weather expected and generally near to slightly below normal temperatures.

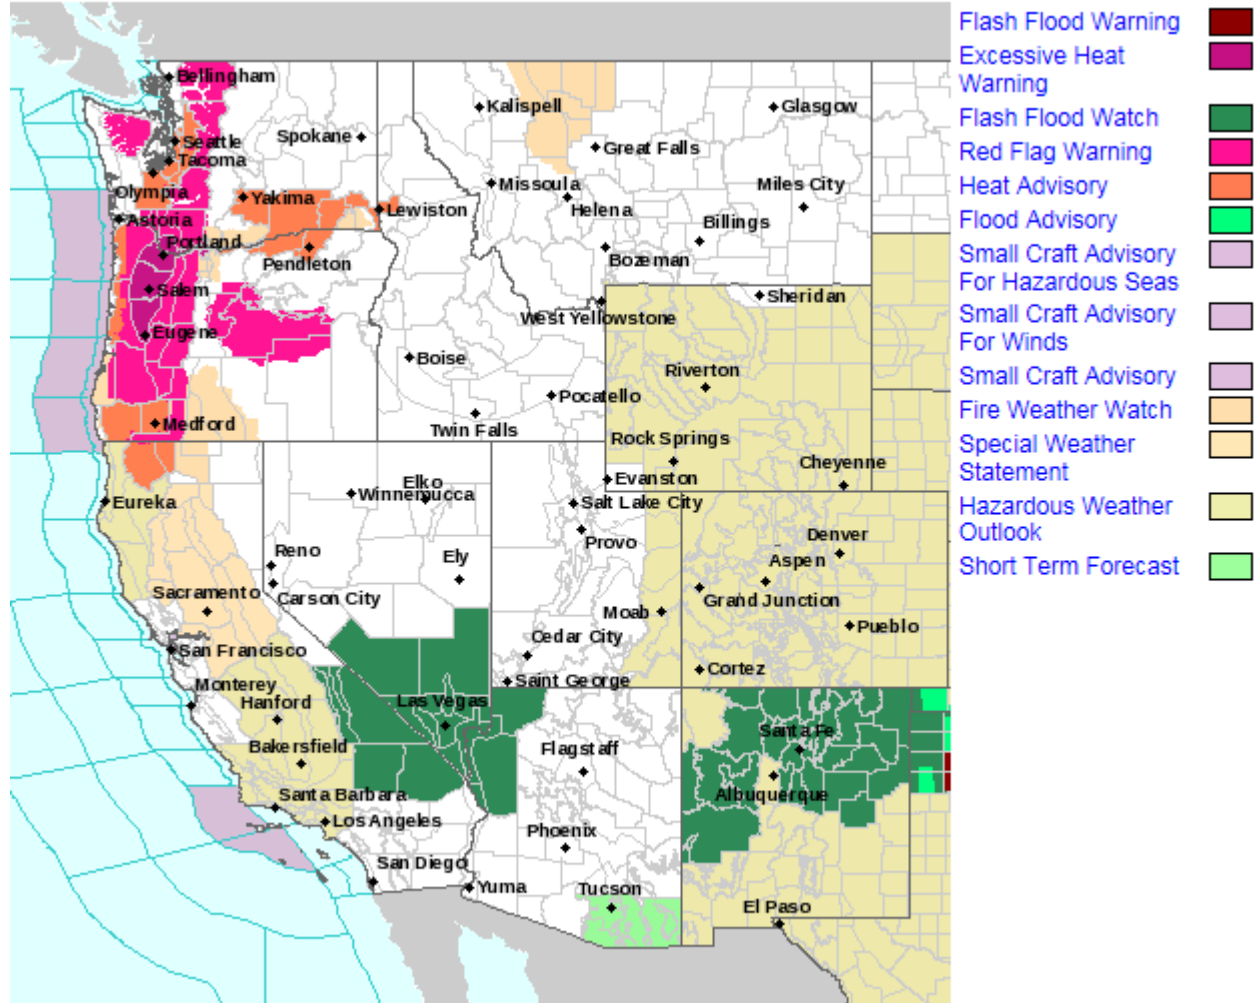

#### **Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

Monsoonal moisture will steadily decrease through Saturday with widely scattered thunderstorms still possible near the higher mountains for this afternoon with isolated flash flooding possible. Dry weather is expected after today and well into next week. The return of drier southwest flow aloft has also brought a greater return of the marine layer with areas of night and morning coastal low clouds and fog extending into the valleys. This is expected to continue well into next week with temperatures mostly near average.

#### **Southeast California Weather:**

Isolated to scattered storm activity is anticipated over southeast California again today. A notable downtrend in moisture from west to east is expected over the weekend. Temperatures will not change much day to day remaining at or above seasonable average.

### **Organized Response to Mass Casualty/Active Shooter Incidents: Leading Practices from Ventura County, California**

#### **Free Webinar**

To improve countywide response to all violent incidents, regardless of size and complexity, a multi-discipline task force was established. Every law enforcement agency, fire department, County Emergency Management Services Agency, EMS transport providers and dispatch center was represented on the task force. The task force developed policies and training programs for a countywide response. To date we have conducted over 150 joint training sessions and trained over 1500 emergency responders.

This webinar will discuss how the Ventura County program was established, as well as roadblocks encountered and solutions for overcoming them. Developing a program is only the first step. The next, and probably most critical, step in the process is conducting joint training. For most agencies joint training, especially between Law and Fire, is not a common occurrence. Joint training methods and training opportunities will be identified. The tactics/skills required in the "Warm Zone" will be presented. Focus will be on those we found challenging in relation to different disciplines working together. Discussion includes incident command and communication problems encountered when operating at these multidisciplinary events.

**Instructor:** Fire Captain J. Scott Quirarte has been with the Ventura County Fire Department for 25 years. Captain Quirarte is the project lead for the Ventura County Interagency Active Shooter Task Force.
